Qualifications & Experience

I've achieved 3 A Levels in Maths, Graphics Communications, and Sociology and currently I'm in my third year of studying Digital Media Design at the University of Winchester. Over the course of my study I have gained much experience in group work, time management, and design principles.

During the summer of 2019 I participated in NCS in which I gained valuable skills in teamwork and effective communication.

Skills

Within the creative process, my biggest strengths lie within creative thinking and ideation. In design I tend to focus on illustration and iconography, but also have large interests in design revolving around gamification and games, especially designing board games.

I am experienced in many design softwares such as Photoshop, Illustrator, InDesign, and After Effects and have some knowledge in coding HTML and CSS.

When working within a team, my strengths are in effective communication, planning, and working with others to formulate creative ideas for a project.
